

REMARKS

5 The Examiner has taken the position that Applicant's previously submitted Exhibits "A" and "B" fail to establish reduction of practice prior to the effective date of the references cited by the Examiner. The Examiner indicates that the Exhibits fail to provide evidence that the Kaleidscope program successfully ran and performed the claimed limitations prior to the effective date of these references.

10 Responsive thereto, Applicant submits herewith a Declaration of inventors Craig Dillon and Richard Howe under 37 CFR 1.131(b)(c). In the attached declaration and accompanying Exhibit "A", the inventors set forth facts and proof that they diligently worked on and, reduced the invention to practice prior to the date of the
15 references (but after the effective date thereof)(37 CFR 1.131(b)). The inventors also show that the work evidenced in the attached Exhibit "A" shows diligent work toward reduction of practice. That, coupled with the filing of the subject application, meets the requirements of 37 CFR 1.131(c). Accordingly, Applicant's evidence supports Applicant's assertion that the invention was
20 conceived before the effective date of the references and was diligently reduced to practice, all comporting with the requirements of 37 CFR 1.131. Therefore, Applicant respectfully requests the Examiner withdraw the rejection based on the references of record and allow the Application to issue as U.S. Letters Patent.

25 Respectfully submitted,

Julia A. Thomas

Reg. No. 52,283

30 Customer No. 22,862

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Dillon, et al.

Docket No.: ISAA0040

Serial No.: 10/032,843

Art Unit: 2167

Filed: DECEMBER 27, 2001

Examiner: Linh Black

Title: System and Method for Obtaining Keyword Descriptions of Records from a Large Database

August 7, 2006

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Declaration of Craig Dillon under 37 CFR 1.131

1. My name is Craig Dillon and I am an inventor of the claimed subject matter in U.S. Patent Application Serial No. 10/032,843.
2. In the Office Action mailed 2 June 2006, the Examiner indicates that my previously submitted declaration under 37 CFR 1.131 is ineffective to overcome the Strubbe *et al* reference and the Mikurak reference.
3. The Examiner indicates that my declaration meets my burden under 37 CFR 1.131(b). However, the Examiner indicates that my proof does not support my reduction to practice of my invention prior to the effective filing date of Mikurak and Stubbe, *et al*. The Examiner indicates that my Exhibits A-B must show that the Kaleidoscope program successfully ran and performed the claimed limitations.
4. 37 CFR 1.131(b) requires that the inventor show conception prior to the effective date of the reference coupled with due diligence from prior to the reference date to subsequent reduction of practice. 37 CFR 1.137(c) requires conception of the invention prior the effective date of the reference coupled with due diligence from prior to the reference date of the filing date of the filing of an application (constructive reduction of practice). In this regard, I am relying on my previous submissions cited as evidence of my conception of my invention prior to the effective date of the references.
5. In support of my diligent reduction to practice of the invention from prior to the reference date there is subsequent actual reduction of practice (37 CFR 1.131 (b)) I enclose herewith a listing of files in connection with a working prototype of

the Kaleidoscope product. The initial working prototype was completed on or about March 2000. I continued working on the invention thereafter through 2001. In attached Exhibit "A", the date appears with each file. The date shown is the last date the file was worked on, *i.e.* the last revision date. It can be seen from viewing the attached that the previously submitted evidence of conception, having a date of 7 November 1999, coupled with the exhibits attached herewith show dates as early as November 16, 1999, that I have provided evidence of my diligence in reducing my invention to practice. The Exhibit provides files of a fully functioning system. It can be seen by reviewing the dates of the various files that make up the product build set forth in Exhibit "A" that the work was continuous and uninterrupted. Accordingly, my submissions comply with the requirements of 37 CFR 1.131(b).

6. I also am entitled to take advantage of 37 CFR 1.131(c). In this regard, my previous submissions are evidence of my conception of the invention prior to the effective date of the cited references as acknowledged by the Examiner. Exhibit "A" enclosed herewith is substantial evidence of my diligent reduction of practice of the invention. Further evidence of my reduction of practice of the invention can be derived from the filing of the instant application on 27 December 2001, well within the time frame of the work that is supported by the attached document. Accordingly, I have met my burden with regard to 37 CFR under section (b) and (c) thereof.

7. I therefore ask the Examiner to withdraw the rejection such that I may enjoy the benefit of a patent for my invention.

8. All statements made of my own knowledge are true, and all statements made under submission are believed to be true. I understand that willful false statements and the like are punishable by fine or imprisonment or both (18 USC 1.1) and may jeopardize the validity of this application or any patent issuing thereon.

Craig Dillon

In re Application of: Dillon, et al.

Docket No.: ISAA0040

Serial No.: 10/032,843

Art Unit: 2167

Filed: DECEMBER 27, 2001

Examiner: Linh Black

Title: System and Method for Obtaining Keyword Descriptions of Records from a Large Database

September 5, 2006

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION UNDER 37 C.F.R. § 1.131

This declaration is provided in connection with Applicant's response to the Office Action dated 2 June 2006 for the above-identified patent application.

1. My name is Julia A. Thomas. I am the registered attorney duly appointed by the inventors of the invention in the subject patent application. I am submitting this declaration on behalf of an unavailable inventor, Richard Howe. Please see the attached Petition Pursuant to 37 CFR 1.47.
2. In the Office Action mailed 2 June 2006, the Examiner indicates that Richard Howe's previously submitted declaration under 37 CFR 1.131 is ineffective to overcome the Strubbe *et al* reference and the Mikurak reference.
3. The Examiner indicates that Richard Howe's declaration meets the burden under 37 CFR 1.131(b). However, the Examiner indicates that the proof does not support the reduction to practice of the inventor's invention prior to the effective filing date of Mikurak and Stubbe, *et al*. The Examiner indicates that the Exhibits A-B must show that the Kaleidoscope program successfully ran and performed the claimed limitations.

4. 37 CFR 1.131(b) requires that the inventor show conception prior to the effective date of the reference coupled with due diligence from prior to the reference date to subsequent reduction of practice. 37 CFR 1.137(c) requires conception of the invention prior the effective date of the reference coupled with due diligence from prior to the reference date of the filing date of the filing of an application (constructive reduction of practice). In this regard, the inventor is relying on the previous submissions cited as evidence of inventor's conception of inventor's invention prior to the effective date of the references.

5. In support of inventor's diligent reduction to practice of the invention from prior to the reference date there is subsequent actual reduction of practice (37 CFR 1.131 (b)) enclosed herewith a listing of files in connection with a working prototype of the Kaleidoscope product. The initial working prototype was completed on or about March 2000. The inventor continued working on the invention thereafter through 2001. In attached Exhibit "A", the date appears with each file. The date shown is the last date the file was worked on, *i.e.* the last revision date. It can be seen from viewing the attached that the previously submitted evidence of conception, having a date of 7 November 1999, coupled with the exhibits attached herewith show dates as early as November 16, 1999, have provided evidence of the inventor's diligence in reducing the invention to practice. The Exhibit provides files of a fully functioning system. It can be seen by reviewing the dates of the various files that make up the product build set forth in Exhibit "A" that the work was continuous and uninterrupted. Accordingly, the submissions comply with the requirements of 37 CFR 1.131(b).

6. The inventor also is entitled to take advantage of 37 CFR 1.131(c). In this regard, the previous submissions are evidence of conception of the invention prior to the effective date of the cited references as acknowledged by the Examiner. Exhibit "A" enclosed herewith is substantial evidence of the inventor's diligent reduction of practice of the invention. Further evidence of the inventor's reduction of practice of the invention can be derived from the filing of the instant application on 27 December 2001, well

within the time frame of the work that is supported by the attached document. Accordingly, the inventor has met the burden with regard to 37 CFR under section (b) and (c) thereof.

7. I therefore ask the Examiner to withdraw the rejection such that the inventor may enjoy the benefit of a patent for his invention.

8. All statements made of my own knowledge are true, and all statements made under submission are believed to be true. I understand that willful false statements and the like are punishable by fine or imprisonment or both (18 USC 1.1) and may jeopardize the validity of this application or any patent issuing thereon.

Attorney Docket ISAA0040

Title: SYSTEM AND METHOD FOR OBTAINING KEYWORD DESCRIPTIONS OF RECORDS FROM A LARGE DATABASE

September 5, 2006

**PETITION BASED UPON UNAVAILABILITY OF INVENTOR
(37 CFR § 1.47/MPEP 409.03)**

Sir:

1. Applicant petitions pursuant to 37 CFR §1.47 that the examination of the above-identified patent application proceed in the absence of a Declaration signed by the inventor Mr. Richard Howe.
2. Applicant provides herewith a copy of the letter sent via email to Mr. Howe, at his last known email address at richard.howe@acxiom.com, which was delivered with a read receipt delivery. A copy of the 1.131 declaration accompanied the letter. A read receipt delivery was returned confirming that the message was read.
3. Craig Dillon, a joint inventor of the above-referenced application and Elizabeth Flanagan, a paralegal at Fair Isaac Corporation, attempted to contact Richard Howe without success.
4. Diligent efforts have been used to reach the inventor.
5. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001

of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this statement is directed.

6. This action is necessary to prevent irreparable damage and to preserve the rights of the parties.

The Commissioner is authorized to charge the petition fee forth in 37 CFR 1.17 (i), and any additional fees that may be due and credit any overpayments to Deposit Account No. 07-1445 (Order No. ISAA0040).

Respectfully submitted,

A handwritten signature in cursive script that reads "Julia A. Thomas".
